

The **RX4+** is the new and updated version of the current RX4 calipers, the **RX4+** will supersede the current RX4 calipers. Previously, the RX4 caliper came as a Shimano or SRAM caliper with three variants available for each, as shown below.

- RX4 Postmount
- RX4 Front Flat Mount Direct 160mm (FFD)
- RX4 Rear Flat Mount Direct 160mm (RFD)

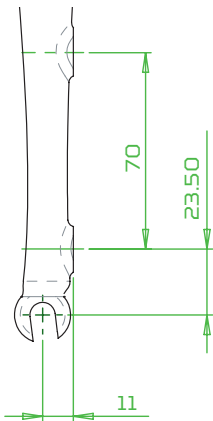

The Hope RX4 Front Flat Mount and Rear Flat Mount calipers differ to most other manufacturers calipers. We manufactured the 'mount' into the caliper, therefore they bolt directly onto the fork or frame mount and use a Ø160mm rotor.

NEW MOUNTING OPTIONS

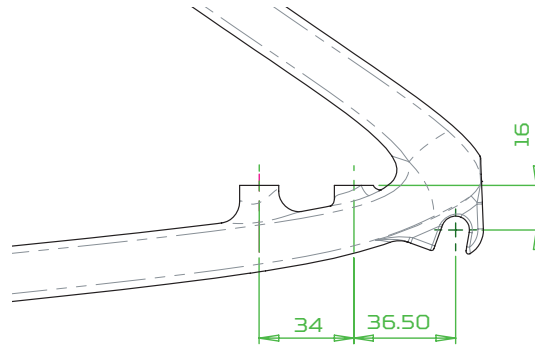

When we originally designed the RX4 caliper there were only two mounts shown below.

- Flat Mount Front (140/160mm)
- Flat Mount Rear (140/160mm)

FRONT F140/160

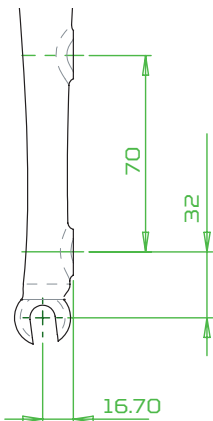

REAR R140/160

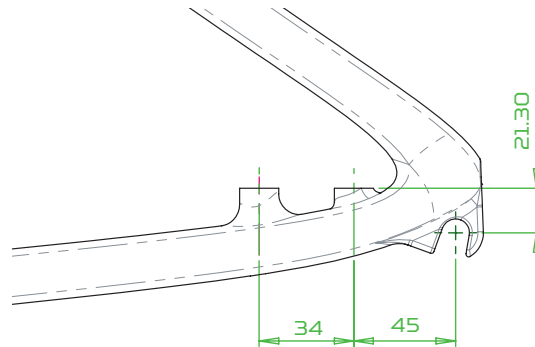

Since launching the original RX4 caliper variations of these mounts are appearing, see below. This limits the RX4's use in certain applications.

- Flat Mount Front (160/180mm)
- Flat Mount Rear (160/180mm) This has also been seen on front forks.

FRONT F160/180

REAR R160/180

In summary the current calipers are limited by their design.

RX4 Front Flat Mount Caliper	Fits directly on a F140/160	mount using a Ø160mm rotor
RX4 Front Flat Mount Caliper	Fits directly on a F160/180	mount using a Ø180mm rotor
RX4 Rear Flat Mount Caliper	Fits directly on a F140/160	mount using a Ø160mm rotor
RX4 Rear Flat Mount Caliper	Fits directly on a F160/180	mount using a Ø180mm rotor

As shown above, the rotor size is dictated by the mount with the Hope Flat Mount Caliper. To alleviate this issue we have revamped our current RX4 range.

RX4+

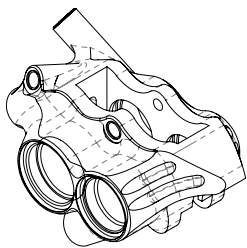

We are keeping with the current model of offering a Postmount caliper, Flat Mount Front Direct and Flat Mount Rear Direct calipers with the addition of a new Flat Mount caliper. The following calipers will now be available.

- RX4+ Postmount Not changing
- RX4+ Front Flat Mount Direct FMF +20mm **OLD NAME:** RX4 Front Flat Mount FFD
- RX4+ Rear Flat Mount Direct FM +20mm **OLD NAME:** RX4 Rear Flat Mount RFD
- RX4+ Flat Mount: FM **NEW!**

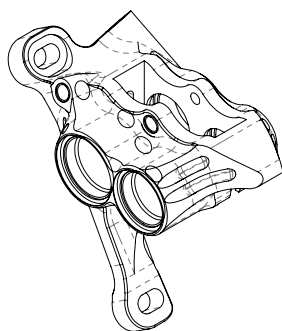

The new **RX4+** caliper will work with the new mount standards we are seeing, either bolting direct or requiring the use of a mount, see the table below.

	Front 140/160mm	Front 160/180mm	Rear 140/160mm	Rear 160/180mm
RX4+ Front Flat Mount Direct FMF +20mm	Ø160mm Direct	Ø180mm Direct	Ø160mm Direct	Ø180mm Direct
RX4+ Rear Flat Mount Direct FM +20mm	Ø160mm Direct	Ø180mm Direct	Ø160mm Direct	Ø180mm Direct
RX4+ Flat Mount	X Mount - Ø140mm Z Mount - Ø160mm	X Mount - Ø160mm Z Mount - Ø180mm	Ø140mm Direct Y Mount - Ø160mm	Ø160mm Direct Y Mount - Ø180mm

RX4+ Flat Mount +20

ADDITIONAL CHANGES

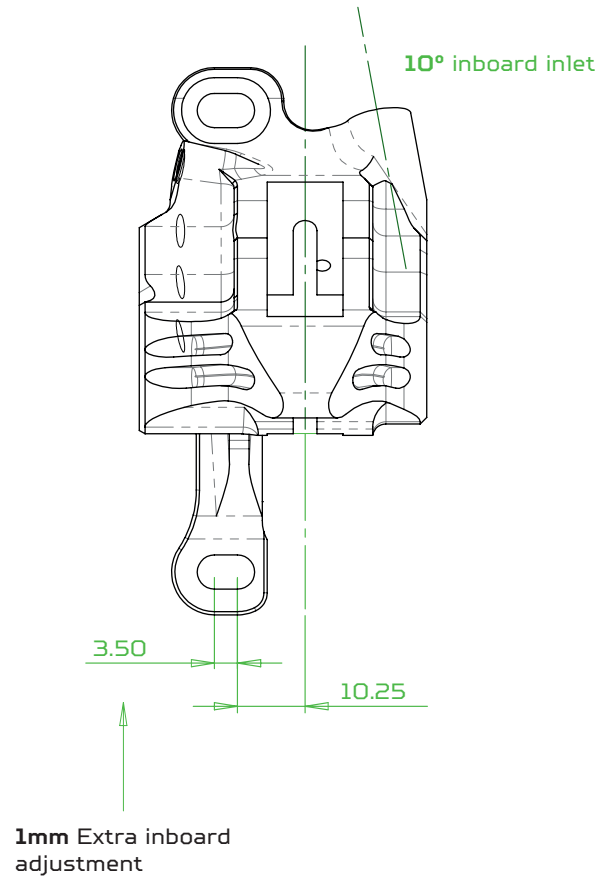

In addition to the changes to the mount design, we have also made some further modifications. Previously the RX4 SRAM Caliper used 2 x 11mm and 2 x 14mm pistons. From further testing we have deduced the pistons can be larger, so we have brought them up to match the RX4 Shimano Caliper (2 x 14mm and 2 x 16mm).

Customer feedback also highlighted the current hose inlet angle caused clearance issues and adjustment was sometimes on the limit for centering the caliper.

RX4

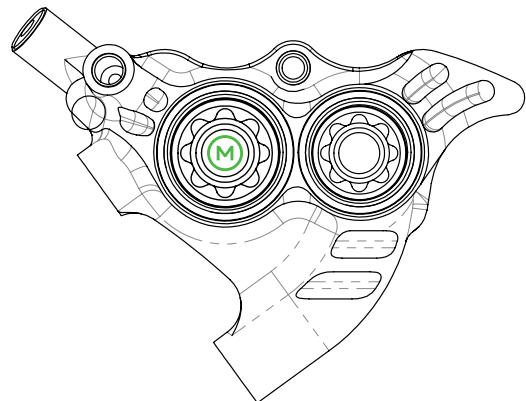

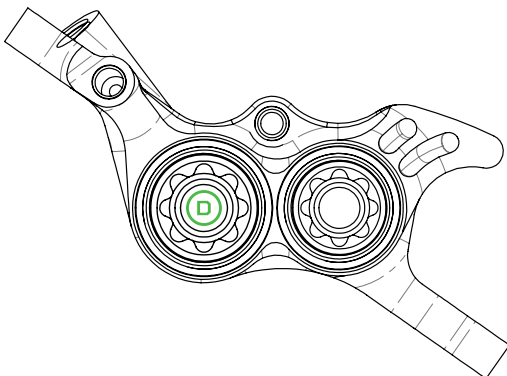

RX4+

IDENTIFYING FEATURES DOT V MINERAL

Bore caps will have **D** or **M** etch to signify oil type.

PART NUMBERS AND DESCRIPTIONS

The RX4+ supersedes the RX4, therefore we have given it all new part codes. We have also moved away from calling calipers by Shimano and SRAM, they are now labelled by the fluid used, Mineral Oil (**MIN**) or Dot Oil (**DOT**).
