

ROLLSPEED W – Anti-puncture All Season tyre

- Rollspeed W is the first studless All Season tyre for 28" & 26" trekking and city bikes.
 - It's a real All Season tyre, so there's no need to change tyres when the winter season is over.
 - Excellent puncture resistance against sharp gravel used on icy roads in Skandinavia.
 - One Year Factory Warranty against punctures.
 - Excellent grip and longevity due to Nokian Hakkapeliitta Winter Rubber tread compound (durometer 58A). Winter Rubber is natural rubber and carbon-silica based compound and also HA-oil free.
 - Durable 66tpi Gumwall structure with Overlap structure.
 - Tread sipes increase grip specially on hardpacked snow and icy roads.
 - Low rolling resistance due to compact center tread design.
 - Nokian Driving Safety Indicator (DSI) in the center tread displays the groove depth of the tread. Numbers will disappear one at a time at the same tempo as tyre will be worn.
- **Sizes available:** 47-622, 37-622, 47-559
- Rollspeed W will be launched in Eurobike 2008.
