XC RACE	<input type="checkbox"/>
TRIALS	<input type="checkbox"/>
ROAD	<input checked="" type="checkbox"/>

HUBS / WHEELS

DESCRIPTION:

This was the first road wheelset we have, and following the winning combination of the Pro2 wheelsets - strength, lightweight and reliability, this entry into the road market is a great combination for those looking for a wheelset to train, race, tour or just RIDE on!

Again using DT Swiss componentry for rims and spokes - we have chosen the super reliable and race ready DT RR1.1 rim in a 32h (silver) We've speced silver brass nipples and DT Competition double butted spokes in silver again, which are laced and hand tensioned onto our Mono Pro 3 hubs - also stainless steel bearings are used to give long, smooth and free running performance.

This package we believe gives a great all round wheel, which is light enough to race, strong enough to train on and reliable enough to complete sportives and tours on.

Wheels come individually or as a pair and come complete with custom 'Hoops' etching on the hub, rim tapes, spare spokes and nipples and rim stickers.

Wheels are packaged in purpose made wheel boxes to avoid damage in transportation.
